

Power Tool Usage and Personal Protective Equipment Requirements

MICHIGAN STATE
UNIVERSITY

Equipment type: Cordless Drill/Driver _____

Date: _____

Department: _____

Employee: _____

Tool manufacturer: _____

Task: _____

Potential Hazard	Type of PPE Required	PPE Required (Yes / No)
Chips, Dust	Safety Glasses with side shields	Yes
Noise	Hearing Protection	Yes
Hot surfaces, rough surface materials	Heat and cut/puncture resistant gloves	Recommended

Precautions

Hot surface hazard. Avoid touching bits or cutting surface.

Check for wiring. Make sure the surface you are drilling into does not contain any wiring. Contact with a "live" wire will make the tool become "live" and shock the operator. Always hold tool by insulated gripping.

Machine can turn on accidentally, to prevent don't carry tool by the switch and always ensure the switch is in the off position before plugging in.

Do not attempt to charge the battery pack with any chargers other than ones specifically designed to work together. Any other use may result in the risk of fire or electric shock

Remove any adjusting key or wrench before turning power tool on.
A wrench or tool left in the tool may result in personal injury.
